

# Surgery ? Botox ?

We have an alternative

## The Anti-Ageing Program

### Cryo Restructurel by PIER AUGÉ

## The first non-surgical facelift

### Why?

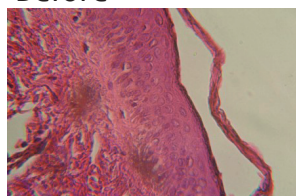

The Hp DNA and the Hyaluronic Acid combination is

a PIER AUGÉ'S EXCLUSIVE INNOVATION.

This combination has been rewarded for its exceptional nature in 1984 by the **CNRS** and the **ANVAR**, the two highest French scientific authorities who described it as a **real biological facelift**.

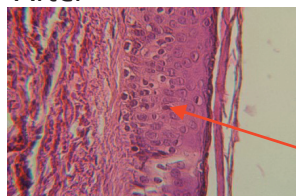

### How ?

#### Before

The **Hp DNA** is from molecular biology. Hp means **Highly polymérize** that is to say intact from the molecular point of view, which is essential to be effective and to transmit the basic informations to the protein biosynthesis.

#### After

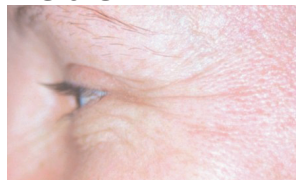

The ADN hp : - is an antioxidant

- is moisturizing
- protects against the short UV radiations
- controls the sebaceous function

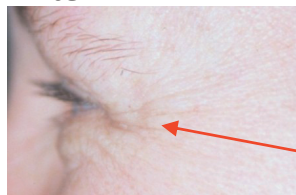

Cell  
regeneration

#### Before

The **Hyaluronic Acid** is the main component of the dermis basic substance that is how it ensures the **connective tissue structure**. The Hyaluronic Acid absorbs 300 times its weight in water, it is one of the most powerful moisturizers.

#### After

The Hyaluronic Acid :

- plumps the epidermis
- fills in wrinkles
- firms up the skin, elastic fibres are stimulated and tonified
- controls the moisturization

Decrease of  
crow's-feet  
wrinkles
