

BEAUTY Oasis NEWS LETTER

Hi Everyone,

What a glorious start to the summer we have had, I hope you are enjoying it and have managed to get a little break away somewhere.

We are busy in all the salons waxing and painting nails and tanning everyone for the summer. Our St Tropez tan is so popular that we keep having to order more in to keep up with the demand.

We were lucky enough to win the Bristol and Bath Post award for small business in May and went to Ashton Gate to receive it. Our team are doing so well and we are so proud of them. Another trophy to add to the shelves.

We have now added Gemma to Weston Salon therapists to cover Monika's maternity, Gemma was working in our Clevedon Branch. She is doing so well and has been given some amazing reviews on our facebook page.

We are looking forward to seeing you in the salons soon and enjoy the sun safely!

With love Sarah

BEFORE

EYEBROW TINTING

Are your eyebrows looking sparse?
 Are your eyebrows fair or blonde?
 Would you like your eyebrows to look more defined?

Eyebrow tinting makes the eyebrows look thicker, so the sparse areas become less noticeable.

Tinting is a great way to make them look fuller and more pronounced. It helps balance natural features and enhances the look of your eyebrows and you can enjoy smudge free eyebrows.

To really transform the look of your eyebrows why not book in for an eyebrow shape too!

(Patch test required 48 hours before tinting)

AFTER

EYELASH TINTING

Are you going on holiday? Are you allergic to mascara?
 Do you suffer with itchy/watery eyes from hayfever?

If you answer YES to any of the above then tinting could be the answer. What is eyelash tinting?

Eyelash tinting is basically dyeing your eyelashes in the colour of your choice to help visibly lengthen and darken your eyelashes.

Eyelash tinting is also waterproof, which is a huge advantage, especially when swimming on holiday or when you suffer from itchy/watery eyes from hayfever.

The dye that is used for eyelash tinting is a vegetable based dye and contain very few chemicals

(although a patch test is required 48 hours before tinting).
